

KENNY FEIERSTEIN

SOFTWARE ENGINEER | CYBERSECURITY & INFRASTRUCTURE
JACKSONVILLE, FL • (904) 716-8151 • kenfeier@gmail.com

PROFESSIONAL SUMMARY

Security-minded Software Engineer with 10+ years of experience designing, migrating, and maintaining production web systems with a strong focus on **infrastructure security, microservices, access control, database integrity, secure system design, and operational pipelines**. Hands-on experience managing **Linux servers, cloud infrastructure (GCP; expanding to AWS), SQL and NoSQL databases, RESTful API integration, secure migrations, operational automation, and front-end design for modern and legacy websites**.

EDUCATION **Bachelor of Science (BS), Information Science (Computer Science Program)**
University of North Florida

CERTIFICATIONS **CompTIA Security+ (SY0-701)**

PROFESSIONAL EXPERIENCE

Art Fair Source Book – Remote/Contract **2025 – Present**
Software Engineer/Infrastructure & Security

- Led **full production server migration** from legacy hosting to **DigitalOcean**, ensuring data integrity, service continuity, and improved security posture.
- Implemented security best practices including **least-privilege access, encrypted communications, and controlled network exposure**.
- Provisioned and hardened Linux infrastructure, including **droplet creation, Apache installation, and service configuration**.
- Migrated **MariaDB databases**, ensuring accurate data transfer, access controls, and backup integrity.
- Configured and managed **DNS for domain, Infusion/Keap API, and SendGrid integration**.
- Created a **Docker container** for local development, Git version control, and deployment
- Performed ongoing **server maintenance, updates, and troubleshooting** to ensure availability and security.

Tech Stack: PHP, PostgreSQL, Apache, Linux, DigitalOcean, SSH, TLS/SSL, CRON, PowerShell, Docker

Time4Learning – Remote **2021 – 2024**
Software Engineer (Full-Stack)

- Collaborated with academic course curriculum developers to create complex online interactive experiences for grade school students.
- Optimized **RESTful APIs** for data retrieval, reducing response through query optimization and caching strategies.
- Developed and maintained features while ensuring timely delivery and adherence to requirements outlined in **Jira** tickets.

Tech Stack: Node.js, JavaScript, React, Vue 2, C#/ASP.NET, SQL

XCEL Solutions (an STC Company) – Jacksonville, FL **2014 – 2021**
Software Developer

- Devised and maintained a database of student information needed to complete course audits and ensure regulatory compliance for each state, facilitating continued sales in the most profitable locations.
- Automated manual reporting systems using Node.js and SQL, saving 15+ hours/week in operational costs.
- Implemented CI/CD pipelines for reporting systems, enabling customized data delivery for clients and contributing to multi-million-dollar contract retention.

Tech Stack: Node.js, React, HTML, CSS, VBA, JavaScript, SQL

SELECTED PROJECT EXPERIENCE

DCFpro.com

2021 – 2024

Full-Stack Developer

- Created infrastructure for **front-end, back-end, and database systems**.
- Defined and enforced **NoSQL security rules** to prevent unauthorized CRUD actions.
- Integrated secure payment processing and subscription-based access with **Stripe**.
- Managed production and QA environments to reduce deployment risk.

Tech Stack: React, Node.js, Express, NoSQL, JavaScript, Cloud Functions, Firebase, Stripe, Redux

SECURITY & TECHNICAL SKILL OVERVIEW

➤ **Security & Infrastructure:**

- TLS / SSL Configuration
- SSH & Secure Remote Access
- DNS Configuration
- IAM Concepts & Port Management
- Server Migration & Hardening
- Database Security & Backups
- Linux Server Administration
- Incident Troubleshooting

➤ **Web Development:**

- React, Node.js, HTML, CSS, Tailwind CSS, JavaScript, TypeScript, Redux, Vue.js, JSON,
 - Created SPA websites for desktop and mobile platforms.
 - Designed scalable back-end APIs to facilitate global state management and seamless database interactions.
 - Structured and optimized data in JSON format to enhance transfer efficiency and simplify manipulation.

➤ **Database Management:**

- MongoDB, SQL, NoSQL, Firestore, SQL Server Management Studio
 - Generated dynamic server-side reports to support sales team strategies and client decision-making.
 - Streamlined data storage and optimized scope for efficient querying and reduced latency utilizing NoSQL.
 - Ensured data security and compliance with industry standards.

➤ **Cloud Management:**

- Google Cloud Platform and Firebase
 - Managed personal and professional websites utilizing GCP and Firebase hosting, **storage, cloud functions, pipelines, and data buckets**.
